

## **REQUEST FOR COUNCIL ACTION**

**SUBJECT:** Discussion and possible action regarding electronic recording and broadcasting of city meetings.

**SUMMARY:** Currently West Jordan records the audio from City Council meetings and then after the meeting posts the audio file on the city website for residents to access. Because many meetings include content that is not provided as part of the agenda packet, the listener may miss out on critical elements of the meeting.

With many electronic meeting solutions available in the market allowing for a wide range of recording options that extend beyond our current audio-only method, it is proposed that Council direct Staff to investigate various options available and present a recommendation to Council that will improve Resident's ability to access City meetings electronically.

### **POSSIBLE ACTIONS:**

Direct Staff to research various options available to modernize meeting recording and broadcasting and return to Council with various options and financial and staffing impact.

### **MOTION RECOMMENDED:**

There is no recommended motion however Staff could be directed to provide information at a later meeting which Council could act upon.
